

Portland General Electric and the Confederated Tribes of Warm Springs
Pelton Round Butte Hydro Project
Selective Water Withdrawal Facility Tour
February 27, 2009

On February 27, 2009 at the conclusion of the 2009 Oregon Chapter American Fisheries Society Conference a tour will be conducted of the new Selective Water Withdrawal System that is currently under construction within the forebay of Round Butte Dam. Discussion, facility tours, and lunch will be provided from 12:30 to 3:00.

Discussion topics will include:

- Reservoir surface current orientation
- Juvenile and adult fish capture and release
- Fish sorting, enumeration, PIT tag detection, marking, and transportation
- Deschutes River and Lake Billy Chinook water quality management
